## *When to Visit*

The nature has always something to offer. Incredible game viewing can be expected at any time and there is not really a 'best time of year' for game viewing.

September-April (Summer). Rains: Average 500 mm. p.a. Can reach up to 40 degrees C in peak Summer and fall to 25 degrees at night. The vegetation is lush and verdant attracting incredible birdlife and many newborns appear at this time of year. It starts cooling down from March onwards.

Low: May-August (Winter). Generally no rain at this time of year. Cold mornings and evenings. The vegetation is sparser resulting in improved visibility or game viewing as the animals make their way to the water holes for hydration. Temperatures reach about 25 degrees C max during the day and fall to between 5-10 degrees C at night. We supply hot water bottles for the night. It can be very cold in the early morning.
